Mission: To construct a Child Labour Residential School Building for girls who are underprivileged, beggars, working on construction sites, showing circus on roads, begging in trains and etc.

CHILD LABOUR SCHOOL FOR BOYS

PROJECT MASOOM PART 2

Mission: To construct a Child Labour Residential School Building for boys who are underprivileged, beggars, working in hotels, motor garages, showing circus on roads, begging in trains and etc.

ORGANIZATION BACKGROUND

Azad Ali Shah Education Society (Azad NGO) is a registered non-government organization, working from last 24 years as an Education NGO by providing education to child labour, adults, and neo-literate women. Azad NGO focussed on encouraging healthy attitudes in children, creating awareness of education and different needs of children from different backgrounds. From several years the organization is busy in abolishing child labour from the society and successfully running the child labour schools in different slum areas of Aurangabad city.

We are an operational NGO, we plan and carry out boots-on-the-ground projects to accomplish our objectives. This requires a great deal of careful planning, communication, and local involvement for each project. According to PROJECT MASOOM Our goal as an organization is to accomplish the following:

Goals

- Overall goal & objectives of the project are to completely abolish child labour from the city & around the district.
- We think doing work is never be a bad thing but it should be in right age, at right time. It has been observed over decades that, poverty forces poor families to send their children to work there are many families whose financial condition is really bad and they are helpless to send their child for work to earn money instead of going to school, we want to help this kind of people or families by providing education to their child for free of cost and also help them financially as much as we can.
- To provide quality & qualitative education to minority poor children & for the people in masses who live in distress around & are from economically financially weaker condition.
- To give the equal rights to every child and to guide them in right direction.
- To make the awareness of education in society for better & bright future.

We hope to further our progress to reaching these goals through the project outlined in this proposal.

PROBLEM STATEMENT

For many years, child labour has been one of the biggest obstacles to social development. It is a challenge and long-term goal in many countries to abolish all forms of child labour. Especially in India and developing countries, it is considered as a serious issue these days. Child labour refers to children who miss their childhood and are not able to have the basic amenities which a child should have. Recently the International Labour Organization (ILO,2013) estimated there are around 215 million children between the ages five to fourteen who works worldwide. They are often mistreated and work for prolonged hours, in very bad conditions. This can affect their health physically, mentally and emotionally. These children do not have the basic rights like access to school or health care.

Children usually work to contribute and provide financial support to their families. Their health is often ignored by their parents or they may not be aware of their children's health.

The results of this study explain the reasons which force children to work, poverty. This project proposal also draws the conclusion that governments, societies, and communities should cooperate in a better way with each other to decrease child labour. Possible and innovate solutions and the big change of this era will arise at the completion of this project.

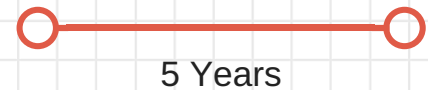

PROJECT RESULTS

- Previously the organisation worked on many child labour projects which were proved result oriented and successful in many aspects. But now we want the big change! and we are expecting it from this project.
- After the project completion, Many child labours and poor background child's will take education from the secular education centre with residential facilities, after the completion of this project the slum areas will get the benefit and they will get the opportunity for free education and it will become one hub for free education for child labour especially.
- The volume of child labour and poverty will decrease, it will create the education awareness itself in the underprivileged section.
- Every girl and boy have the opportunity to develop physically and mentally to her or his full potential.
- Every child will be encouraged towards education and every child wants to go to school.
- Parents will also get courage and they too think to send their children to school instead of working at hotels and garages for their better future.

- Every girl and boy will have the opportunity to develop physically and mentally to her or his full potential.
- Every child will be encouraged towards education and every child wants to go to school.
- Parents will also get the courage and they too think to send their children to school instead of working at hotels and garages for their better future.
- If we see, it may look small but if we deeply think about it, we realise that how result oriented work it can be. All the children can learn and happily go to school, We will not see the child working we will see the child learning, we will not see the child is earning and giving money to their parents we will see the child giving exam and giving their result's report to their parents.

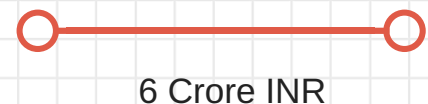

PROJECT TIME FRAME

Completion of Child Labour School Building for Girls:	1.2 Years
Completion of Child Labour School Building for Boys:	1.2 Years
Completion of Child Labour Residential Hostel for Girls:	1.3 Years
Completion of Child Labour Residential Hostel for Boys:	1.3 Years
Other Official and Legal Activities:	2 Months
